### **EMERGENCY MANAGEMENT OF KNOCKED-OUT TEETH AT TBR CAMP PENDHAR ANGANWADI.**

**Date:** 29<sup>th</sup> July 2025

**Venue:** TBR Camp Pendhar, Anganwadi.

**Faculty:** Dr. Vaibhav Thakkar

**Organizing Agency:** Department of public health dentistry MGMDCH, NSS unit of MGMDCH; The Breakfast Revolution

**Number of Students attended:** 4

To manage a knocked out tooth, act immediately: pick up the tooth by its crown, rinse it gently with water or milk if dirty, and try to reinsert it into the socket. If reinsertion isn't possible, keep the tooth moist by placing it in milk, saliva, or a specialized solution. Then, seek immediate dental care, as the likelihood of saving the tooth decreases significantly after 30-60 minute. MGM Dental College constantly takes efforts of extending the oral health care to the community. The oral care initiative was also extended to the children at Pendhar with the intention of providing proper oral health care to the patients.

#### **Aim and Objective:**

1. To create awareness about the significance of fluoride in maintaining good oral health.
2. To educate children on the proper fluoride application
- 3.

#### **Method:**

An examination (Type IV) was conducted using tongue depressor to assess their oral health status. Following the evaluation, the patients were provided with information on how to address any identified dental issues. The patients were explained various common oral lesions caused due to use of tobacco with the help of banners and charts. To enhance their understanding about regular visit to a dentist for check-up, engaging videos were shown that illustrated the progression of oral lesions and highlighted preventive measures. Additionally, a demonstration of proper brushing techniques was conducted using a model. The initiative also included

discussions about the importance of regular dental check-ups, further reinforcing the message of comprehensive oral health care.

### ORAL HEALTH STATUS:

| Sr. no. | Oral diseases | No. Of patients | Percentage % |
|---------|---------------|-----------------|--------------|
| 1.      | Dental Caries | 12              | 40           |
| 2.      | Gingivitis    | 12              | 40           |
| 3       | Root piece    | 4               | 13           |
| 4.      | Prosthesis    | 2               | 7            |

**Observations:** A total of 30 patients were examined for various dental problems. Those requiring extensive treatment were referred to MGM Dental College and Hospital, Kamothe

### Interpretation and Conclusion:

- The patients visiting the camp had Dental caries and gingivitis. Dental caries (40%) and gingivitis (40%) followed by root piece which needed extraction.
- The patient also required prosthesis, which were referred to dental college for immediate treatment and replacement of tooth.
- Oral health education regarding maintaining the proper oral hygiene was demonstrated to them. Modified bass technique was demonstrated used brushing model. Use of interdentally aids like flossing were also demonstrated and advised to them.

Oral screening done at the camp site

### LIST OF ATTENDEES
