Professional Development/ Continuing Dental Education (Cde)Program

Title Of The Program: Comparative Dental Analysis

Organizing Department: Oral & Maxillofacial Pathology

Dates Of Conduct: 21.06.2023

Resource Person: Dr. Samantha Thakur

Target Audience: 58 III BDS Students, 67 Interns ,7 Faculty , 6 PG

Total No. Of Attendees: 131

Goal:

1. To enlighten and spread awareness among students on the importance of forensic dentistry and use of dental knowledge in identification of individuals through analysis of the dental-related records.
2. To enlighten students on scope of forensic dentistry
3. Training on comparative dental analysis using ante-mortem and postmortem records

Implementation:

The program enables the students to acquire knowledge, understanding and skills in forensic odontology and research. Uniquely, they learned about the interdisciplinary skills that are essential for dealing with forensic issues in real life enabling them independently deal with all routine forensic odontological casework; the efficient referral of cases of special difficulty outside or beyond their expertise. They were also taught about the functioning under supervision as a member of a disaster victim identification (dvi) team, the independent preparation of evidence for presentation to courts of law and being aware of their own need for further education in forensic odontology. They were given an exercise consisting of three cases where comparative dental analysis was done using ante mortem and post mortem data. The speaker also spoke about various courses and fellowship offered in and around the globe for forensic odontology

Overall Feedback Report:

Students enjoyed the workshop conducted on comparative dental analysis. In overall feedback the students requested to conduct more of such session that would help them understand such topic in better way.
