National Doctors' Day

National Doctors' Day is observed to honor the profession of doctors and their contribution to the healthcare industry. In India, Doctors' Day is celebrated on the birth anniversary of Dr. Bidhan Chandra Roy that is on 1st July celebrated every year. Dr. Roy was a respected doctor and philanthropist who also served as the second CM of West Bengal. This day is celebrated to honor all the doctors for their contribution to society. Different nations celebrate Doctors' Day on different dates. The first Doctors' Day was celebrated in 1933 by the United States. Since 1991, India celebrates National Doctors' Day.

DEAN'S DESK: NATIONAL DOCTORS' DAY

**Wherever the art of Medicine is loved,
there is also a love of Humanity. ”
— Hippocrates**

***National Doctor's Day* is celebrated on *July 1st* every year in India to recognise the immense contributions of doctors towards society. It also aims to create awareness about the importance of doctors, their selfless service, and the valuable role they play in improving the health and well-being of individuals and communities.**

Its a platform to express gratitude and appreciation to the medical fraternity for their tireless efforts, dedication, and commitment to saving lives, promoting health, and providing medical and dental care to individuals in need .“I remind my fellows, residents and medical students that what we do is a privilege. People let us into the most intimate aspects of their lives, and they look to us to help guide them through very complex and delicate situations.”

The awe of discovering the human body. The honor of being trusted to give advice. The gratitude for helping someone through a difficult illness. These things never grow old.”I always tell my residents to never forget that we have the opportunity to do more good in one day than most people have in a month.”

**Concluding with a message for budding dentists,
Study hard, so that you can say your patient
"Trust me, I am your Doctor " .**

SUB-EDITOR'S SAY : NATIONAL DOCTORS' DAY

Each year on National Doctor's Day, our country takes a moment to celebrate, and appreciate, the thousands of passionate and talented physicians across this great nation. One definition of National Doctor's Day is as simple, and powerful, as this: "An annual observance aimed at appreciating physicians who help save our lives, everywhere."

To my Onsite Family, and physicians across the country: you deserve more gratitude and appreciation than I can possibly communicate. Amidst a global crisis, you have demonstrated what makes physicians so special: your exceptional skill and endless compassion towards people.

Thank you for your bravery, perseverance, and professionalism during these trying times. Thank you for your unwavering commitment to our patients, and our practice. Thank you for being the truly special doctor that you are.

Thank you for a making a difference every day, and saving lives, everywhere.

Happy National Doctor's Day!

Professor
Department Of Periodontics

FACULTY : NATIONAL DOCTORS' DAY

"Medicines cure diseases, but only doctors can cure patients."

-Carl Jung

In India, National Doctors' Day is celebrated on 1st July on the birth anniversary of Dr. Bidhan Chandra Roy who also served as the second Chief Minister of West Bengal. Mr. Roy was a highly respected doctor, philanthropist, and politician.

Doctors' Day is being celebrated in India since 1991. Government and non-government healthcare organizations, take the opportunity to thank doctors for their contribution.

Small to big events are organized in hospitals and clubs all throughout the country. As Dr. Bidhan Chandra Roy hailed from West Bengal, the grand event is organized at the Doctors' Day Rotary Club in the state capital Calcutta. Hospitals in co-ordination with several non-government organizations arrange free medical checkup camps for the general public. Also, award and commemorative events are held at several levels for the doctors.

As Doctors are very important members of society. They are in fact the only savior in the face of disease and sickness. Their effort in keeping society free from diseases and misery must be acknowledged. For ages, doctors have served the society in their own capacities and helped keep it healthy and happy. To cherish their hardwork and efficiency we celebrate National Doctors' Day.

PARENT'S SPEAK

NATIONAL DOCTORS' DAY

A doctor dedicates his life to the service of the patients. He or she relieves the sufferings and pain of mankind. He cures them from disease and illness. He strives to make the life of others better and healthier. The observance of National Doctor's Day fulfills a need to show the doctors and physicians in our lives.

Words could never express our gratitude for all you did and continue to do for our dad. You are truly two amazing, compassionate & brilliant human beings! We admire you both for your commitment to all of those patients and families who you touch every day! To all the doctors that cannot exercise their passion because they made the brave decision to give it up in search for a better life, I want you to know that the medical community sees you. The lives you touched in your past will never forget your work, and you shouldn't either.
