

Aim

The workshop focuses to equip the participants with early identification of arrhythmias and management.

Objectives

1. To review the Anatomy and Physiology of heart
2. To describe the fundamentals of ECG
3. To develop skills in interpreting normal and abnormal Rhythms

Introduction

Nurses care for critically ill patients 24/7 in the intensive care units. In many occasions they come across patients developing life threatening arrhythmias. Nurses with adequate knowledge and skill would be able to recognize the arrhythmias and initiate appropriate interventions.

About us

MGM New Bombay College of Nursing, a constituent unit of MGM Institute of Health Sciences (Deemed to be University u/s 3 of UGC Act, 1956 Grade A Accredited by NAAC), laid its foundation in 2008. The College offers Undergraduate, Postgraduate & Ph.D programme in Nursing with realistic and successful access to higher education.

In the year 2016, recognizing the significant expansion in tertiary care services, the Union Ministry of Health and Family Welfare launched Nurse Practitioner in Critical Care (NPCC) Post Graduate Programme. MGM New Bombay College of Nursing started the competency based NPCC programme as one among the pioneering institutes in India from 15 November 2017.
