Subject: Permission to carry out histopathological studies in Zebrafish.

Respected Madam,

I am a PhD student in Medical Genetics and working under the guidance of Dr. Mansee Thakur. My PhD topic is based on "*Studies On The Mechanisms Of Action Of Homeopathic Drugs On Osteoporosis In Zebrafish Model*".

We are carrying out some experiments on the effect of glucocorticoid on adult and larval zebrafish. In this connection we would like to monitor the histopathological changes in the bones of adult and larval zebrafish induced using glucocorticoids. I would be grateful if you would kindly permit us to use the facility of histopathological analysis available in the pathology Dept of Dental College.

I assure that I will assist the concerned staff for processing the samples wherever required.

Thanking you.

Sincerely,  
Ms. Himanshu R. Gupta

Dr Sabita Ram

Kindly allow,  
Regards, Chandan Pun.

  
PhD Scholar, Medical Genetics  
Batch 2014
